VANCO INTERNATIONAL INTRODUCES PATENT PENDING WHOLE HOUSE AUDIO AND HOME THEATER WALL PLATES

Batavia, IL. September 25, 2007 – Vanco International, an innovative supplier of home theater electronics for over 50 years, is introducing three patent-pending Whole House Audio and Home Theater Combination Wall Plates.

These exclusive wall plates are designed to allow for the connections of a whole house audio and home theater system at one convenient wall location. The unique combination of these two features on one wall plate offers a precise, professional installation. With three configurations available, installers will have no problem finding one that will work for their specific installation needs.

The first combination is a Whole House Audio with 6.2 Home Theater Wall Plate. This plate provides an open port (3/4" x 1-9/16") for bulk wire and direct connections to the system's A/V components and combines it with a 6.2 home theater plate designed for home theater systems that consist of (6) audio speakers and (2) subwoofers.

The next configuration is a Wide Port (dual gang) Whole House Audio with a 6.2 Home Theater Wall Plate. This provides a larger open port (3/4" x 2-1/2") for bulk wire and direct connections to the system's A/V components and combines it with a 6.2 home theater plate designed for home theater systems that consist of (6) audio speakers and (2) subwoofers.

The final design is a Whole House Audio with 7.2 Home Theater Wall Plate that offers an open port (3/4" x 1-9/16") for bulk wire and direct connections to the system's A/V components and a 7.2 home theater configuration designed for home theater systems that consist of (7) audio speakers and (2) subwoofers.

All of these wall plates accept up to 12 AWG wire, include gold plated binding post and RCA jacks

for excellent sound performance, and are compatible with Dolby® digital sound systems. Installers will find that these all-in-one wall plates are a complete solution to their whole house audio and home theater installation needs.

These innovative wall plates will be shown at EHX Fall 2007, booth # 1035, along with a variety of additional innovative wall plates and home theater accessories.

The web site can be reached at <http://www.Vanco1.com>.
