### **VANCO INTERNATIONAL EXPANDES LINE OF SUCCESSFUL QUICKTYE- STANDOFF™**

Batavia, IL. September 15, 2007 – Answering customer demand, Vanco International, Inc., an innovative supplier of electronic accessories to the home theater, low voltage, and electronic distributor markets for over 51 years, is launching a Screw-In version of their already tremendously successful Nail-In, patent pending QuickTye-Standoff™.

Cable installation just got even easier with Vanco's QuickTye-Standoff™ Screw-In version. This unique new product provides a quick and easy way to attach and secure cable to studs during installation. The standoff installs in less than 1/3 of the time than traditional methods, accommodates cables of varying bundle sizes, all while following CEDIA installation standards. This simple idea offers big solutions for installers who will save time and money.

This latest version is great for commercial applications that require metal studs, and also convenient for some residential coastal areas where building codes require metal stud construction. QuickTye-Standoff™ is perfect for installers that prefer screw attachment of products versus nails or those jobs that require even more holding power than traditional nail in installations.

When installed, QuickTye-Standoff™ provides a 1" clearance between the wire and the stud allowing room to avoid contact with dry wall screws. It may be used on metal or wood studs and comes pre-loaded with screw, wire tie, and housing.

Vanco International doesn't just want to talk about the QuickTye-Standoff™ they want installers to try it for themselves. Be sure to stop by booth #1035. Vanco will also have many other items on display to exhibit their commitment of Advancing Connectivity.

The web site can be reached at <http://www.Vanco1.com>.
