Vanco International, LLC INTRODUCES QUICKTYE-STANDOFF™

Batavia, IL. October 12, 2006 - Vanco International, LLC, an innovative supplier of electronic accessories to the home theater, low voltage, and electronic distributor markets for over 50 years, has unveiled the new patent pending QuickTye-Standoff™.

Cable installation just got easier with Vanco's QuickTye-Standoff™. This original new product provides a quick and easy way to attach and secure cable to studs during installation. The standoff installs in less than 1/3 of the time than traditional methods, accommodates cables of varying bundle sizes, all while following CEDIA installation standards. This simple idea offers big solutions for installers who are able to save time and money.

Vanco's President, Brad Corbin, developed the idea for QuickTye-Standoff™ based on his knowledge of CEDIA requirements and as a solution to save time after observing the installation of a home theater in his own home. "I was once again reminded that labor

cost is such a major portion of any installation and that time saving products such as QuickTye-Standoff can provide fantastic solutions and save money."

Vanco International, LLC is pleased to add this exciting new product to the market and is confident that it will be a success.
