

HDEXWIR

Pairing Guide

1. Connect the transmitter and receiver with a HDMI cable.

2. Power on the receiver. The POWER LED and LINK LED of the receiver will be on and solid.

3. Power on the transmitter. After successfully pairing, the LINK LED on the transmitter will flash. If pairing fails and the LINK LED on the transmitter remains solid, return to step 2.

NOTE: The LINK LED on the receiver will always be on through the pairing process.
