IR SIGNAL ANALYZER
Ideal for testing IR Frequency, Strength, Voltage and Pinout

- Convenient, hand held IR Signal Analyzer for testing IR Frequency, Strength, Voltage, and Pinout
- Ideal for troubleshooting IR signal deficiencies
- Point and shoot to test IR Frequency on any remote
- Measures signal strength to identify strong and weak spots throughout an installation area
- Pinpoints IR Signal Voltage measurement
- Provides IR-RX Pinout (Power, Ground, Signal) Ideal for mixed IR applications
- Supports cascade to enhance extending distance
- Dimensions: 3.7" W x .8" H x 3.5" D

Part Number: EVIRTEST
