## o FEATURES

The PA2X amplifier series from PulseAudio are an ideal solution for residential and commercial audio installations that require a simple setup and great sound output. With a small footprint, but high output, these Class D amplifiers can sit on a desktop, or can easily be mounted on a wall or within a rack using the included mounting brackets. The amps can be used in a stereo system, but can also be switched for use in bridged or mono applications. The inputs consist of two stereo audio inputs, two RCA inputs, and a single 3.5mm input for versatility. Also includes an auto-ON feature so the units do not need to be powered manually, just hit play and the amps will power on automatically! With a broad range of power output to pick from, the Pulse Audio PA2X amplifier series are a great solution for any desired application.

## ○ PANEL DESCRIPTIONS

1. MODE selection between Stereo, Mono, or Bridge
2. Connection to speakers using the included phoenix connector
  - For stereo operation, connect the Left and Right speaker wires to the corresponding terminals
  - For bridge-mono operation, connect the positive speaker wire to the L+ and the negative speaker wire to the R+ terminals
3. Connect a source device to the INPUT terminals - 3.5 or RCA\*
  - 3.5mm connection
  - RCA connection
4. Connect the included power supply (115/230V input)

\*NOTE: When both source inputs are connected, the 3.5mm input and RCA inputs mix

## ○ CONNECT AND OPERATE

1. Connect an audio source to either the 3.5mm or the dual-RCA inputs
2. Connect the speaker wires to the provided green phoenix connector, ensuring the negative port on the amp is going to the negative terminal on the speaker(s), and the positive port on the amp is going to the positive terminal on the speaker(s).
3. Use the MODE switch to select the correct configuration
  - a. For Stereo mode, all ports on the phoenix connector will be used
  - b. For Bridge/Mono modes, only the outside ports of the phoenix connect will be used

4. Ensure the voltage switch is setup correctly to be used with the electrical standards in your region (set to 115v by default)
5. Connect the amp to an electrical outlet using the provided power lead
6. Press the POWER button to turn on the amplifier. A green LED will display indicating the amplifier is ready to use, a red LED will display indicating the amplifier is in the "Auto-On" state to conserve power
7. Turn on the source device and set the source output level.
8. Adjust the VOLUME using the rotary volume control; turning clock-wise will increase the volume level

Please note that after 5 minutes of inactivity, the amp will go into the "Auto On" state

## ○ MOUNTING

The PulseAudio PA2X series amplifiers can be mounted to a desk, shelf or wall using the provided brackets

- Use the 1/4" long machine screws to mount the brackets to the case
- Use the 9/16" long wood screws to attached the amplifier and brackets to a wood desk or shelf
- If mounting to a desktop, first remove the feet from the bottom of the amplifier

## o LIMITED WARRANTY

With the exceptions noted in the next paragraph, Vanco warrants to the original purchaser that the equipment it manufactures or sells will be free from defects in materials and workmanship for a period of two years from the date of purchase. Should this product, in Vanco's opinion, prove defective within this warranty period, Vanco, at its option, will repair or replace this product without charge. Any defective parts replaced become the property of Vanco. This warranty does not apply to those products which have been damaged due to accident, unauthorized alterations, improper repair, modifications, inadequate maintenance and care, or use in any manner for which the product was not originally intended. Items integrated into Vanco products that are made by other manufacturers, notably computer hard drives and liquid crystal display panels, are limited to the term of the warranty offered by the respective manufacturers. Such specific warranties are available upon request to Vanco. A surge protector, power conditioner unit, or an uninterruptible power supply must be installed in the electrical circuit to protect against power surges. If repairs are needed during the warranty period the purchaser will be required to provide a sales receipt/sales invoice or other acceptable proof of purchase to the seller of this equipment. The seller will then contact Vanco regarding warranty repair or replacement.
